SERVICE BULLETIN (NO. 5)
(NOTICE OF SUPERSESSION)

61723 BRAKE DRUM

REPLACEMENT DRUM: 61733

We have superseded our 61723 brake drum and have replaced it with our 61733 brake drum. This change is made to provide longer service life in applications where the 61723 is used. The drums are totally interchangeable, with the 61733 being rated as an extra heavy duty drum.

All current open orders for 61723 drums have been filled with 61723 drums.

Please mark your records to show that any future requirements for the 61723 drum should be filled with the 61733 drum. The 61733 brake drum is shown in our current brake drum catalog and price list.
