SERVICE BULLETIN (No. 15)

(NOTICE OF PRODUCT CHANGE)

FLANGE NUTS

In order to be completely interchangeable with the Budd Uni-Mount 10™ series of hubs, we have changed the flange nut used on our version of these hubs.

Effective immediately, Webb flange nut part number 179933 with a hex size of 33mm, will become the standard nut on all Webb 10-stud hubs designed for use with pilot mounted disc-wheels.

The Webb hubs which this change affects are as follows:

Trailer Hubs

2021

2023

2321

2323

Truck Hubs

2523

2621

2623

Our 179955 flange nut, will remain the standard nut on all Webb 8-stud hubs designed for use with pilot mount disc-wheels.

Please note the above change in your copy of our new WEBB® Wheel and Hub Catalog TBTW888, pages 26, 27 and 28.

Uni-Mount 10 is a trademark of the Budd Company.
