

## 63680F Brake Drum Update

The purpose of this bulletin is to notify customers of the recent change to Webb's 63680F brake drum. Webb's original drum design has four recessed text pockets located in the outside back face of the brake drum. The updated drum design will have three recessed text pads located at the outside wraparound portion of the brake drum. The image below provides a visual comparison for customers to differentiate the original design from the updated design. Please note, this change does not affect the fit, form, or function of the brake drum.

Once the current 63680F inventory is depleted, this change will become effective immediately. If you have any questions regarding this bulletin, please contact Webb's Engineering department via email to [engineering@webbwheel.com](mailto:engineering@webbwheel.com) or call 800-633-3256.
