SERVICE BULLETIN (No. 19)

(NOTICE OF PRODUCT CHANGE)

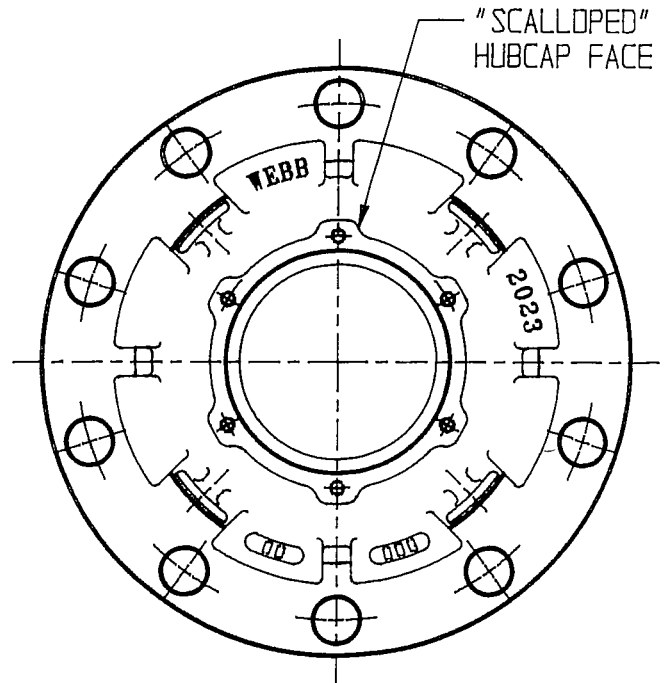

HUB DESIGN

Although the current designs of our cast steel hubs have for years been considered an industry standard by many trailer manufacturers, we have implemented a design change which allows us to improve our foundry casting procedures and subsequently the weight of the finished product.

This change, while not affecting the well known advantages of our hubs, has caused a cosmetic change to the hub cap end of the hub only, as detailed below.

**Old Design
2023 Hub**

**New Design
2023 Hub**

While the visual identity may change slightly, you will continue to receive the same high quality and superior performance from our product.

The new hub designs have been phased into production as form, fit, and function does not change. See reverse side for a sample assembly drawing.

**CURRENT HUBS
AFFECTED**

**2023
2028**

**WEIGHT SAVING RESULTING
FROM DESIGN CHANGE**

**5 LBS.
7 LBS.**

**NEW DESIGN
WEIGHT**

**40 LBS.
39 LBS.**
