## **SERVICE BULLETIN (No. 35)**

The purpose of this bulletin is to advise you of recent changes to the part numbers of our 5 and 6 Spoke Drive Wheels. Effective immediately, the part numbers shown under the column headed "CURRENT" have been changed and replaced by the part numbers shown under the column headed "NEW".

<b>CURRENT</b>	<b>NEW</b>
<b>3625</b>	<b>3525</b>
<b>3650</b>	<b>3550</b>
<b>3660</b>	<b>3560</b>
<b>3662</b>	<b>3562</b>

The purpose of this change is to make the above products meet the standard dimensions for ABS tone wheel locations developed by SAE Truck and Bus Subcommittee. These dimensions will be published under SAE J1842 and J1730 in the SAE Handbook.

The prices for the new "35" series drive wheels remain the same as the prices of the old "36" series drive wheels. The brake drums used on the old 36 series will continue to be used on the new 35 series. The new 35 series wheels without ABS tone wheels fully interchange with the previous 36 series wheels.

Should you require additional information on this change, please contact either our Engineering or Sales Department.
