SERVICE BULLETIN NO. 46

INTERCHANGE CORRECTIONS

This service bulletin is issued to correct the following interchanges shown in our current Brake Drum Catalog TB696BD.

We have been advised that the use of our 65545B, in place of the following manufacturers' part numbers, will result in interference with dust shields on several Ford truck applications.

We are therefore suggesting the use of our 61528B as the Webb interchange for these numbers:

Dayton	123382
	123413
	123366
Motor Wheel	89870B
Budd	106449
	230-8401
	235-9102

Please correct your catalogs accordingly. To those who use Karmak's "Parts Wizard" electronic catalog, the file will be corrected as soon as possible.
