## **SERVICE BULLETIN NO.51**

### **ALUMINUM HUBS FOR ANTI-SKID BRAKING SYSTEMS**

Our aluminum hub supplier, Consolidated Metco, will be phasing in a product change over the next few months on all steer, drive and trailer axle aluminum hubs for anti-skid braking systems (ABS). Consolidated Metco will be converting from a powdered metal ABS tone ring to a stamped steel tone ring. This tone ring material change will not affect the fit, form, or function of existing hub applications.

Although this product change does affect Consolidated Metco part numbers, Webb Wheel Products will incorporate this as a running design change and we will retain all existing aluminum hub part numbers. This bulletin has been sent to you as advance notice of the upcoming aesthetic changes to these aluminum hubs.

If you have any problems or questions with this change, please call the Webb Product Engineering Department at (800) 633-3256.
