SERVICE BULLETIN # 67

1220 HUB

The purpose of this bulletin is to advise that our 1220 hub is **OBSOLETE** effective immediately. Castings to produce the hub are no longer available.

There is no direct replacement for the 1220 hub however; you have the option of using our 1221 hub as a replacement. There are differences between the 1220 and the 1221 in weight, drum pilot, drum mount and stud type.

If the 1221 is used as a service replacement for the 1220, the entire assembly must be replaced. Brake drums used on the 1220 and 1221 are not interchangeable.

The 1221 can be used as an OEM (Production) replacement for the 1220 on D22 axle type applications.

If you have any questions regarding this change, please contact us at the address and phone number shown in this bulletin or at sales@webbwheel.com.
